

OHIO FFA CAMP MUSKINGUM

Nature's Classroom is hiring instructors for the Spring season!

WHAT WE DO?

We have groups of students, typically 6th graders, that come to camp for an outdoor education experience with their classmates and teachers. Each instructor is assigned to each field group. As an instructor, you would eat meals with your group, take them on hikes, lead team-building activities, and give them a tour of our nature center. Instructors also teach 'classes' to the students, which can be on a variety of topics. We let our instructors choose what they want to teach, so as long as you can construct a class to fit our teaching philosophy, you can teach it. With some of our groups we run a living history program based on the underground railroad. We also do other camp activities, like campfires, large group games, and dances.

WHEN?

Our two week staff training begins on February 27, 2011. After training, the season runs through until June 3, 2011.

SOUND FUN?

WHAT WE WANT?

We're looking for people who love kids, want to learn, and are excited about being outside. Camp experience is great! Though having experience teaching nature is a plus, it isn't necessary, we believe that as long as you are excited to learn, we can teach you what you need to know.

WHAT YOU GET?

All of our instructors live in our staff house, which is pretty much like a normal house with several bedrooms. Students are supervised by their school teachers at night, so once we have snack and let them go, our instructors are free to head back up to the staff house without camper supervision responsibilities. The staff house has a full kitchen and living room with Directv, and has laundry facilities (no charge). Instructors can use the satellite internet that we have in the office during their free time, and meals are provided when camp is in session. Salary is paid twice a month. Besides all of that, you get to learn a lot, interact with kids, and have fun.
